ABOUT ME

I am a dedicated Bachelor of Information Technology (Honours) student (current CGPA: 2.74) with nine years of professional experience in quality assurance, logistics operations, and customer service. My diverse background has strengthened my analytical thinking, attention to detail, and ability to adapt quickly in fast-paced environments. I have a strong technical foundation in web development, database management, LAN configuration, and systems analysis, supported by hands-on experience with Python, Java, SQL, and modern productivity tools. I enjoy solving problems, improving processes, and delivering reliable, well-structured solutions. Driven by continuous learning and a disciplined work ethic, I aim to contribute effectively to IT teams while progressing toward more advanced technical roles.
